

*Inspiring the Community One Flip at a Time*

FLIP FOR FUNCTION SERVES CHILDREN WITH SPECIAL NEEDS BY DELIVERING PEDIATRIC OCCUPATIONAL THERAPY IN THE COMMUNITY. USING GYMNASTICS CLUBS AS A NATURAL ENVIRONMENT, FULL OF EXCITING, SENSORY RICH ACTIVITIES.

Flip for Function students learn by participating in individualized, strength-based treatment sessions to address muscle development, coordination, self regulation, body awareness, sensory integration and so much more! Our gymnastics based therapy sessions focus on the strengths and unique needs of your child. With the ability to participate in a gymnastics center full of novel experiences and movement becoming a means and an end, we work together to improve gross motor and fine motor skills in a natural environment full of opportunities for social interaction.

*Flip for function is beneficial in improving:*

- Sensory Regulation
- Coordination
- Strength
- Core & Posture Control
- Balance
- Fine & Gross Motor Skills
- Range of Motion
- Confidence
- Social Skills
- Motor Planning
- And Many More!

# Services

Here at Flip For Function we offer therapy and recreational services.

---

## Therapy Programs

### 1:1 SESSIONS

We provide direct occupational therapy services from Certified Licensed Occupational Therapists. Upon intake, therapists will administer an evaluation to determine a functional baseline, strengths, activities that bring your child joy and increase engagement, identify areas of concern, and determine appropriate, developmental goals.

We recognize that some children with exceptionalities have rare opportunities to participate in activities amongst other peers. In this environment, children will have opportunities to take part in a sport and to interact and practice social skills with other children and adults.

---

## Recreational Programs

### 1:1 GYMNASTICS

We offer 1:1 gymnastics classes for children with different needs to facilitate movement and participation in the sport. These sessions will be led by Occupational Therapists or trained coaches with experience working with children with different needs. These sessions will provide your child with various sensory opportunities, helping to regulate attention, awareness and behavior.
